

## Year 6

### Summer Term

Let's Celebrate!

Our final fantastic topic in year 6 will begin with a ... celebration! After their hard work over the year, we are starting off with our final term at Primary School celebration. We will look at what's key to every celebration and then vote on the top 10 as a class. We also put our Geography skills to the test and have to look at the most effective way for our VIP guests can arrive in time for the party, from all across the globe!

The children will then move on to art, specifically looking at the work of Pablo Picasso and his work as part of the Mardi Gras celebration. They will recreate some of his abstract work through a digital programme, design their own abstract artwork in the style of Picasso before finally recreating their digital design through collage!

Next, we move onto music and explore the work of Hans Zimmer in the Lion King. The children will listen to his compositions and identify the 7 elements of music and explore the effect of changing each element on the audience. They will then practise recreating the circle of life with different instruments, in groups, before moving onto exploring singing through our end of year show. The children will learn different vocal warmups and practice signing (in tune) with smaller and larger groups as well as layering over each other for effect. We also explore projection and learn how to develop our vocal range.

Then, we explore D&T through our annual 'Health Week'. The children decide what makes a healthy and balanced menu and plan a menu for a healthy picnic! As a class we then choose a dish to create together and the children make it in pairs and create a recipe for someone else to follow along. Then, for the best part... we eat it at our healthy picnic 😊. After this, we explore how different foods are grown, produced, reared and caught! To further develop the children's understanding of this process we get the chance to 'facetime a farmer' and learn all about their livelihood.

Finally, to finish off our 'Let's Celebrate' we perform our fantastic end of year show to the whole school and invite the children's parents in! We can't wait to share it with you!
