

## Year 4 - Summer Term

### Young Entrepreneurs

This exciting topic will begin with visitors from the local area who are entrepreneurs and creatives in fashion design. The children will get the chance to ask these visitors about their experiences in business and the design process, how they find inspiration and how they market their product. This will help inspire our children in their upcoming projects.

The children's learning journey will then progress to the subject of History, in this subject area the children will be learning about the British fashion industry, changes in fashion and clothes and the impact it has had on the world. We will then focus on fashion designers who have created famous film costumes such as Bond, Harry Potter, Judge Dredd and other exciting movies! After researching and examining different fashion designers and choosing their favourite, we will move to Design and Technology. We will design our own pattern that could be used in movie fashion, all inspired by our favourite designer from the movies. Children will look at close-up drawings and different materials and textures to decide on the best way to create their designs, as well considering how colour can create impact.

Continuing with Design and Technology we will look at movie clothing accessories, such as scarves and headwear, and how we can use the knowledge of how these are used effectively in the film industry to create our own. After researching and developing step-by-step plans for our own scarves we will make them. This will include using chosen materials fit for purpose and tie dye to create a contrast of colour.

Finally, after evaluating their projects, the children will choose how to present them at a Fashion Show/Movie/Drama style presentation in front of their peers.
